## DETAILED ACTION

### *Specification*

1. The abstract of the disclosure is objected to because of the language alleging benefits. Correction is required. See MPEP § 608.01(b).
2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 rejected under 35 U.S.C. 102(b) as being clearly anticipated by applicant cited Carney et al.

Carney discloses a lock assembly fig. 1 adapted to be detachably attached to a LAN-cable connector 21 which is integrally fixed to a LAN cable 62 and adapted to be removably inserted into a socket 73 and latched at an inserted position thereof fig. 3, said lock assembly being operable, when attached to the LAN-cable connector, to allow said LAN-cable connector after being inserted into said socket

to be locked at said inserted position fig. 9, and, when detached from said LAN-cable connector, to allow said LAN-cable connector to be removed from said socket fig. 8.

***Claim Rejections - 35 USC § 103***

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 12 rejected under 35 U.S.C. 103(a) as being unpatentable over applicant cited Carney et al in view of applicant cited Marson et al (US4911646). Carney discloses a lock assembly fig. 1 adapted to be detachably attached to a LAN-cable connector 21 which is integrally fixed to a corresponding one of a plurality of LAN cables 62 and adapted to be removably inserted into a corresponding one of a plurality of sockets 73 and latched at an inserted position thereof fig. 3, said lock assembly being operable, when attached to the LAN-cable connector, to allow said LAN-cable connectors after being inserted into said socket to be locked at said respective inserted positions fig. 9, and, when detached from said LAN-cable connector, to allow said plurality of LAN-cable connector to be removed from said corresponding socket fig. 8.

Carney does not disclose a plurality of connectors and cables.

Marson discloses a lock assembly fig. 28 attached to a plurality of connectors and corresponding cables. At the time the invention was made it would have been obvious to one of ordinary skill in the art to modify Carney so that the lock assembly of Carney could be used with a plurality of connectors as taught by Marson. The suggestion for this change is found in Carney in column 1 lines 18-26. Well settled case law has shown that merely duplicating a part for multiple

effect is not grounds for a patent, *In re Harza*, 274 F.2d 669, 671, 124 USPQ 378, 380 (CCPA 1960)

### ***Allowable Subject Matter***

8. Claims 2-11 & 13-25 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
9. The following is a statement of reasons for the indication of allowable subject matter: Basically the engagement means and restricting means where the restriction means restricts a latch flap from being released.

### ***Conclusion***

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The art listed in the accompanying PTO-892 teaches connector lock assembly.
